Nov 7 7

Sir,

The continued influx of remittances for minor Coins has deranged all our calculations as to the duration of supplies for that part of the Mint service.

Our stock of Blank Acknowledgements, of remittances received, will soon be exhausted, and I am obliged to make requisition for 2,500 more. Can I get them? Please advise me.

Very Respectfully

Mint of the United States at Philadelphia Pa.
SUPERINTENDENT'S OFFICE

7 Nov. 1887

Sir;

Yours of the 5th inst. received. Karats are no longer used in Mint operations, but thousandths. 1000 fine means absolutely pure gold or silver; 900 fine is the standard of United States gold and silver coins. We sell gold bars for manufacturers 999 fine, but under the Act of Congress, in sums of not less than 5000 dollars in value. We make fine bars for depositors of bullion as you will see by the enclosed circular, in not less amounts than 100 dollars in value.

You can purchase these bars of Sailor & Stevenson bullion dealers, no. 38 South 3d. Street, Philadelphia, but at what price

I do not know.

I suppose you are aware that fine gold is too soft for watch cases and chains and even 18 karats fine would not possess the required durability

Respectfully

D. McFee

Superintendent

Artemas Martin Esq

United States Coast Survey Office

Washington

Nov 7 7

Sir

Your samples received. The enclosed envelop No 1 will answer our purpose for pay envelope but I find that the principal use made of No 2, herewith enclosed, is to put up, new 5¢ nickels, in sums of $5. to be delivered to applicants at the Cashiers counter.

The weight of the package and the sharp edges of the coin require a strong heavy envelope like No 2. Please send us 3000 No 1 immediately, and 6000 No 2 as soon as they can conveniently be furnished

Respectfully Yours
D. McFee

Superintendent

14: November 7

Sir;

I have this day received a communication from the Assistant Secretary of the Treasury apprising me that a proposal of Farrell & Co. for constructing a vault door in the vault formerly occupied by the Assayer for making cupels in this Mint, had been made and accepted, a copy of the proposal herewith being enclosed. If it is not too late I beg to ask that you recommend that the acceptance of the proposal shall be suspended for the present, and that the request be also made that Farrell & Co be advised thereof.

Since my former communication in which reference was made to the space that would be obtained for storage purposes

I have arranged to remove all the water closets and clothes-rooms from the front part of the basement of the Mint building to the rear portion of the premises, and thereby find that a very large storage vault can be obtained directly under the rotunda in the front part of the premises, by merely making a vault door to that space. The storeroom for storage of goods, material, and light machinery, as the space is now occupied, can be transferred to the press-room on the west side (North room) which becomes vacated by the removal of the hydraulic press which formerly occupied it, to the Refinery in the second story where it ought to have been long since. This vacated store-room will contain all the stores that may may be wanted for the institution, and thus

between the removal of the water closets and clothes closets from the first mentioned locality under the Rotunda and the store-keepers material from the adjoining space, my mind is that we will obtain three times the space, at least, greater for storage of Coin, than the smaller vault heretofore used by the Assayer.

As this additional space presents itself as a sequence to the general rearrangement of the basement, I am impelled to ask that the proposed arrangement for storage vault door with Combination lock may be recalled and a door of the same character - though perhaps not of the same size - be made to the storage space afforded under the Rotunda and

substituted instead.

Very respectfully

Sir;

In each of the former years before November it has occurred (b.t. we received orders for dies for coinage to be transmitted to both the San Francisco & New Orleans Mints. We have not as yet received any instructions for the coming year, and as the year is rapidly running to a close, I beg to make the suggestion, that I may have instruction upon that subject at as early a period as can conveniently be;

Very respectfully

Nov 16th

Sir:

In reply to your letter of the 15th inst relative to the bill of Dr. Thos. G. Morton for medical attendance on Employés (Vou #83), I have to say that it has always been the custom of the Department to pay the Physician's bills when presented for Employés of the Mint who were injured or taken ill while in the discharge of their duties. In the cases named the accidents all occurred at night; one, Sallie Clark, a cleaner, having been cut by the falling of an axe, while cleaning. Mr. Elhour, a roller, falling insensible at his post, in which condition he lay for an hour; and Mrs. S. D. Murphy, an adjuster, taken violently ill while adjusting. There seemed to be, as I am informed, an undoubted necessity that a Physician should be called in each of these cases without delay, and I do not see what other course could have been pursued.

This bill was not charged to the Standard Silver Dollar Profits but to the Appropriation for the Coinage of Standard Silver Dollars, which work the Mint has been largely engaged upon for some time past. I will thank you for instructions as to what course you would have me pursue under similar contingencies in the future, and trust that the above explanation will procure the approval of the Department.

Very Respectfully,

Supt.

Hon Jas. P. Kimball,
Director of the Mint.
Washington. D.C.

Nov 16th

Sir:

I acknowledge the receipt of your letter (S.P.S.) of the 13th inst; relative to overcharges for Oil purchased from Powell & Ashtock per Voucher 440, and requesting an explanation of this overcharge and why the purchase was not made from the regular Contractors. I have to state, that at the completion of the new Engines put in by the Kensington Engine Works, and consequent upon making a successful trial thereof, it was deemed necessary by the Engine Builders, that a small quantity of the very best Cylinder and Lard Oils should be applied. The Engines were not ready for the trial start until about five o'clock of the afternoon of July 27th, and the Contractors were particularly anxious to run them until eleven o'clock that night. We had none of this class

of oils on hand, and it was recommended by the Contractors that the Oil in question should be obtained from the above parties without delay. It being a case of extraordinary emergency when a test should be made with the best quality of oil, the Engineer made application for the quantity and kinds of oil referred to. In the absence of any other authorized person to procure the oil and thus save delay, the Bookkeeper was appealed to, to issue an order, which he did in this case, under the belief that it was justifiable. Hoping that the explanation will be found satisfactory.

I am,

Very Respectfully,

17 : Novem: 7

Sir;

I find that we have comparatively a small amount of bronze one cent blanks on hand. I observe on reading Mr Wharton's proposal of the 25th ult. under advertisement of 19th Oct. that he offered to supply the Mint with 50,000 pounds of unmilled one cent blanks at the price of 25.65 cents per pound, (the advertisement called for 50,000 pounds more or less) and then he adds that he offers to fill, from time to time, within 12 months from date my supplementary orders for 250,000 pounds additional of the said blanks at the same price namely, 25.65 cents per pound, making a total offer of 300.000 pounds.

Your letter of 26th ult. says "the bid

of Joseph Wharton of furnishing 50.000 pounds more or less gunmilled bronze one Cent blanks at 25.6 cents per pound is accepted. The price of copper I learn has run up in the market to about 13 cents per pound, and as we will shortly want more blanks, according to Joseph Whartons letter stating that we could have them at the price above named up to the limit thereof, if within 12 months called for, it seems to me that it would be prudent upon our part to have a further supply on hand especially so as the demand for small coin still keeps up unabated: I therefore request that authority be given me to make a further requisition upon Mr. Wharton for at least 50.000 pounds of bronze blanks at this time

Very respectfully

Superintendent

Superintendent.

Assistant Treasurer U. S.

New York

18. Haven. 7

Sir,

In reply to your communication of the 17th inst., I have to state for your information that gold medals are always made of fine gold, unless there be an especial agreement to the Contrary. The only exception to the rule, in our experience, being the medals furnished your Department in 1880 made of Standard a Coin gold by your direction.

Your order for the medals now under discussion, did not specify the fineness of the gold of which they were to be made and the Coiner not being Cognizant of your instructions with regard to the medals furnished in 1880 made the present lot of medals out of fine gold according to our established practice.

The difference in the fineness of the gold, makes; all the difference in the price of the medals; the fine gold being calculated @ $20 $\frac{635}{}$ per oz. and the standard gold @ $18 $\frac{61}{}$ per oz making a difference in each medal of $2 $\frac{23}{}$.

I herewith endose bill ~~in duplicate~~ against the Department of State, properly receipted, as you request.

Very respectfully

R. M. Poe

Superintendent

Sevellon A Brown Esq
Chief Clerk Department of State
Washington

18 Novem. 77

Sir.

The following are Summaries of partial reports of Experiments recently undertaken at my request at this Mint for the purpose of determining if possible the cause of the apparently large production of imperfect planchets or blanks from lack of equality in the thickness and density of fillets by William S. Stiel Esq. Coiner. Jacob Eckfeldt Assayer, and Mr. Samuel James Foreman of Machine Shop respectively.

Mr. Stiel says, with a view of determining the deviations in the Weight of Silver dollar planchets, the following experiments were made.

The Ingots from which 25 fillets were first experimented upon were rolled in Seven draughts on the Break rolls (10" dia. Chilled Iron rolls)

and annealed in an open furnace for 1/2 hour, the air having full access, to a bright cherry red color, and cooled in water and again rolled in three draughts on 8" dia cast steel finishing rolls and the planchets cut from fillet direct from rolls.

25 Fillets Showed average variation 3.49 grains

2. In the next operation the Ingots were operated upon in the same manner as in the former case with the exception of having one more annealing and being drawn in two draughts at the Draw bench, the planchets cut from the fillets show the variation in weight.

25 Fillets average variation 2.056 grains

3. The next trial was with five (5) Ingots which were broken down in nine draughts, and annealed in copper canisters which protected the fillets

from oxidation, subject to the same heat as the others, and cooled as before, then reduced twice on the finishing rolls, and planchets cut from fillets direct from rolls.

10 Fillets average variation 2.57 grains

4 Another operation was tried with two Ingots, both were returned in 7 draughts on the Break down rolls, and annealed in same manner as the first experiment, one Ingot was finished on the Mint rolls in three draughts, and the other finished on geared rolls in the same number of draughts, and the resulting fillets cut into planchets.

| | | | |
|---|---|---|---|
| Mint 1 Fillet | variation | Mint rolls | 8.95 grains |
| | " | Geared " | 5.58 " |
| | " Thickness | Mint " | .001 " |
| Geared 1 Fillet | " | " Geared " | .001.125 " |

4

5. To test the average variation of planchets during a days work six fillets were taken at different periods of the day (Oct 1887) the Ingots from which they were taken were operated upon in like manner as no. 2. and the planchets cut from the fillets were weighed and measured for thickness.
Weight and variation 3.576 grains. Thickness .0006875

6. On another day four fillets were selected from the regular work to note the difference between the two days work (the Ingots were worked in the regular way like no. 2.) with the following variation.
at variation 3.6175 grains. Thickness .0007825

7. Represents a regular working in detail of Silver Indian Ingots. He says. "these trials would seem to indicate that the usual mode of treatment is the best of the means so far afforded."

SUPERINTENDENT'S OFFICE

, 188

Mr. Steels tables inserted here

In Feb last days, a series of experiments were made with Silver Ingots, the object being to obtain if possible, a more uniform result in the weight of the blanks. Below will be given a brief statement of the experiments.

A number of Ingots taken from the regular working was divided into several lots. A lot was treated in the usual manner, that is rolled annealed, finished on the draw bench, and the blanks cut from the strips. A second lot was then rolled, annealed but finished on the rolls. A third lot was rolled as before, but the annealing was done in closed Coffee Canisters, the finishing was then done on the rolls.

The blanks as cut from the strips were all kept in the order of cutting, and carefully weighed in

the Coiner's department.

An experiment was also made with Copper Ingots, the object being, to see what different result Copper might give from Silver. The Ingots were rolled annealed, cleaned to remove the oxide, and a part finished on the draw-bench and a part on the rolls. The blanks all kept in order of cutting and weighed with the following results. (See table) Assuming 859½ grains as the standard weight of the blanks cut from the strips finished on the draw bench, we find the greatest deviation above Standard to be .3 Grains, and the lowest 1.5 grains.

And taking 880 Grains as the standard weight of the blanks from the rolls, the greatest deviation above standard is 3 grains, and the lowest 1.5 grains.

He says, it would seem from these results

that Copper blanks, from work finished on the draw-bench show less deviation from the standard weight, than from that finished on the rolls."

The tables referred to are hereto appended.

The above are the tables referred to in Mr Eckfeldts Report.

Mr James says. that an effort was first made to show the necessity of such careful and judicious melting of the metal and casting of Ingots, as would insure a uniform density throughout the rolled fillet.

That this result is not at all times obtained is fairly shown by the blistering of fillets, when annealed, and by the large number of such fillets returned as unfit _____

for Coin.

With the view of diminishing the cooling effect of the ingot moulds the first step taken was to prepare a set of moulds $\frac{1}{8}$ inch less in thickness than the standard mould.

In three moulds thus prepared there were cast by the Melter and Refiner 32 ingots which were subsequently rolled by the Coiner in eight draughts.

The fillets all became blistered in annealing, and further work upon them was stopped, the metal proving unfit for use.

The blistered fillets were then remelted and again cast into ingots by the Assayer with good results, eight of these ingots were rolled by the Coiner and finished to a thickness of .082" with one annealing.

The result of weights and thickness of 203

planchets cut from the eight ingots are shown in Table I.

The variation, as shown by the weights between extreme limits (no case having been taken to work to standard weight) was 14.41 grains; and, as shown, between limits of thickness 2 5/8 thousandths of one inch.

As the area of the Silver Dollar planchet is equal to 1.76715 inches, by taking the weight of one thousandth of one inch of this area, namely 4.59459 grains and multiplying the same by the difference in thickness between limits, namely 2 5/8 thousandths of one inch, the result is 12.06 grains, or less by 2.349+ grains than the difference as shown by actual weight.

Total variation in weight 14.41 Grains

" " " thickness 2 5/8 thousandths of inch

Weight of two variation thickness

on a sq. in of Cotton blanket 4.594+ grains

Grains Thousandths

4.594 × 2 5/8 = 12.06 Grains

Difference due to personal and

instrumental errors 2.349 grains

This discrepancy is obviously due to want of instrumental precision in measurement in fractions less than one thousandth of one inch.

Table No. 2 gives the result from the rolling of an ingot 10 3/4 inches long by 8 wide and 2/8 thick, cast by the Melting and Refining and rolled on a pair of Chilled iron rolls at the Metal Works of H. Disston & Sons, Tacony.

The ingot was heated to a cherry red heat and in this condition passed between the rolls eight times, whereby the thickness was reduced

from 3/8 of an inch to 83 thousandths. It was then cut into four fillets of equal width, and after annealing at the Mint was finished in three draughts on the Mint rolls to the thickness as shown by the table.

The variation in weight as shown by this table between limits is 13.02 grains, and in thickness 2 1/8 thousandths of one inch.

| | |
|---|---|
| Total variation in weight. | 13.02 grains |
| " " " thickness | 2 1/8 thousandths inches |
| Weight of ~~two~~ variation of thickness on area of Dollar planchet | 4.594+ grains |
| Grains 4.594 + Thousandths 2 1/8 " = | 9.763+ grains |
| Difference due to personal and instrumental errors | 3.257+ grains |

The result obtained from the rolling of an ingot

10 1/2 inches long, by eight wide, and 3/8 thick, is given in Table No. 3.

The rolling was done, as in the former case, at the works of H. Diston & Sons. There were 22 draughts, or passes, between rolls of chilled iron of 16 inches diameter, and the fillets reduced from 3/8 to 85 thousandths of an inch in thickness. The first four draughts were upon geared rolls, the subsequent draughts being upon rolls of which the lower one only was driven, the upper roll being actuated by the metal in passing between the pair. The rolling was done cold, and without annealing.

The wide fillet was then cut into four strips, annealed and finished at the mint in three draughts to the thickness as shown by the table. The variation in weight of planchets cut from this was 13.12 grains and in thickness 8/8

thousandths of one inch.

By multiplication, as in the two preceding instances, results a weight of 14.3658+ grains, showing a difference in excess of actual weight of 1.238 thousandths grains

Total variation in weight 13.12 grains

" " " Thickness 3 1/8 thousandths inches

Weight of $\frac{1}{1000}$ variation of thickness on area of Dollar-planchet+ 4.594+ grains

Grains Thousandths
4.594 + 3 1/8" = 14.3658+ grains

Difference due to personal and instrumental errors 1.238 grains in excess of actual weight

The nothing of a similar ingot at the same time and place is shown by Table No. 4, under the conditions of cold rolling, and between surfaces of chilled iron.

8

The rolls were 16 inches diameter, one roll only being driven.

The thickness was reduced from 3/8 to 94 thousandths of one inch in 15 draughts, the fillet being annealed after the twelfth draught. The fillet was then cut into four strips, annealed and finished upon the Mint rolls in three draughts as shown in the Table, namely,

| | |
|---|---|
| Total variation in Weight. | 18.27 grains |
| " " " thickness | 3 1/4 thousandths inches |
| Weight of 1000 variation of thickness on area of Dollar Planchet | 4.594 + grains |
| Grains 4.594 + Thousandths 3 1/4 = | 14.93 + grains |
| Difference due to personal and instrumental errors | 3.34 + grains |

The following is a summary of Table No. 5. exhibiting results from the rolling of three ingots cast by the Assayer 12 inches long, by 15/8 wide, and 3/8

8

The rolls were 10 inches diameter, one roll only being driven.

The thickness was reduced from 3/8 to 94 thousandths of one inch in 15 draughts, the fillet being annealed after the twelfth draught. The fillet was then cut into four strips, annealed and finished upon the Plain rolls in three draughts as shown in the Table, namely,

| | |
|---|---|
| Total variation in weight. | 18.27 Grains |
| " " " thickness | 3/4 thousandths inches |
| Weight of two variation of thickness on area of Gordon Launchet | 4.594 + grains |
| Grains 4.594 + Thousandths 3/4 = | 14.93 + grains |
| Difference due to personal and instrumental errors | 3.34 + Grains |

The following is a summary of Table No 5. exhibiting results from the rolling of three ingots cast by the assayer. 12 inches long, by 1 5/8 wide, and 9/8

thick, rolled at a cherry heat on 16 inch diameter chilled rolls at St. Dalton & Sons, in eight draughts to the thickness of 83 thousandths of one inch. The finishing of the same before cutting the planchets was done as in the former experiments, with results as shown by the following summary.

| | |
|---|---|
| Total variation in weight | 12.07 grains |
| " " " thickness | 2½ thousandths inches |
| Weight of two variation of thickness on area of Dollar planchet | 4.594+ grains |
| Grains 4.594 + Thousandths 2½ = | 11.486+ grains |
| Difference due to personal and instrumental errors | .584+ grains |

The boys, from the foregoing experiments it is shown that the obtaining of accurate or even uniform results in weight and thickness has not been attained from the finishing Silver fillets from the Rolls, nor is it probable that such accurate results may be obtained by this means so as to insure a large percentage of good planchets as to produce this a variation beyond 1/4 of an inch must not be exceeded. The elasticity of the housings, the spring or bending [illegible] rolls, and also the variation caused by the elastic cushion of the film of oil used as a lubricant around the journals of the Rolls, make up the difficulty of obtaining two fixed or immovable lines of contact between the faces of the rolls, as the metal in the fillet may be either hard or soft, so more or less power is required, and this may act sufficiently upon the various conditions named, as to

11

prevent the closeness of results in weight. It has been shown that planchets cut from fillets drawn on the bench are more uniform in weight because of the dies in the draw plate presenting two fixed lines through which the fillet is drawn, the die between (or the opening) being held by the actual contact of the steel dies to the blocks or die holders, at the same time it must borne in mind, that the foregoing does not imply, that all hope of obtaining closer results from the rolls has been abandoned."

Tables referred to in Mr James' Report 12

## Summary of Table no. 1.

Rolling of 8 ingots cast by Mint Assayer

Ingots 12" long × 1⅝" wide × ⅜" thick.

Rolled on Mint rolls in 9 draughts to 82 thousandths inch thickness annealed and finished in 3 draughts to thickness as per table.

Total variation in weight = 111 41/100 grains

" " " thickness = 25 8/1000 inches

Weight of 1/1000" thickness on area of Dollar planchet 4 5734/1000 grains.

Therefore 4.5734 grains × 2 58/1000 inches Thickness = 12 96/100 grains

Difference due to personal and instrumental error = 2 297/1000 grains

Summary of Table No. 2.

Rolling of one ingot cast by Melter & Refiner.
Ingot $10\frac{3}{4}$" long × 8" wide × $\frac{3}{8}$" thick.
Rolled after being heated to a cherry red heat to $\frac{88}{1000}$" in 8 draughts, and finished after annealing on Mint rolls in 3 draughts, to thickness as per table

| | |
|---|---|
| Total variation in weight | 13 dr. grains |
| " " " thickness | $2\frac{7}{1000}$ inches |

Weight of $\frac{1}{1000}$" thickness or area of dollar flan: = 4 $\frac{594}{1000}$ grains
Therefore 4.594 × $2\frac{13}{1000}$" = 9. $\frac{762}{1000}$ "
Difference due to personal and instrumental errors 3 $\frac{268}{1000}$ "

16

Summary of Table No. 3.

Rolling of one ingt cast by M.&R. Size 10½" long × 8" wide × 3/8" thick. Rolled cold in 22 draughts to 85/100" thickness: Annealed and finished in 3 draughts to thickness as per table. Total variation in weight 13.12 grains

" " " thickness 3 8/1000"

Weight of 1/1000 thickness on area of Dollar planchet 4.594 grains

Therefore 4.594 gr. × 3 8/1000" = 14.356 grains

Difference due to personal and instrumental errors = 1.236 gr. excess.

## Summary of Table No. 5.

Rolling of 3 ingots cast by Assayer 12" long × 1.5" wide × .38" thick. Rolled at a cherry red heat in 8 draughts to .052/1000" thickness. Annealed and finished in 3 draughts to thickness as per table.

Total variation in weight — 12.7 grains

" " " thickness — 2½ thousandth inches

Weight of 1/1000 thickness on area of Roller plunchet. = 4.594 grains

Therefore 4.594 gr. × 2½ thousandth" = 11.486 grains

Difference due to personal and instrumental errors = .585 grains.

Sir,

Our latest advices from the Department, through the Stationery Division, are, that Blank Books are Stationery, and must be ordered on the usual Requisition for Stationery.

We have but one blank Requisition for Stationery, on hand, and there is no room on that to make the Blank Books that we need; and I infer therefore, that there must be some other form of requisition for the purpose, that I have not yet seen.

Will you do me the kindness to make inquiry on the subject, and see that I am supplied with a sufficient number of Blank Requisitions, to enable me to get the Stationery, and Blank

is required for the service of this Mint, during the first six months of the coming Calendar year.

Very Respectfully
Dan'l M. Fox

Sir;

I have to day received through your office and by reference from you, a letter of the 18th inst. from the Cashier of the 1st Nat: Bank of Houston, Texas, inclosing 16 broken and defective 5 & nickel pieces, alleged to have been received by that bank in a lot of One thousand Dollars shipped from this Mint.

In reply I beg to say that the Coins, as referred to, were not in that Condition when they were shipped by the Mint. There may have been some defective pieces that escaped detection on the Counting boards, but none were bagged and shipped in a broken Condition.

I have referred the Communication and

the pieces to the Coroner for investigation. He will make good the number of pieces to the bank without delay. The matter will also be explained to the Bank.

After full inquiry has been made, I will Communicate with you again on the subject

Very respectfully

Memorandum

The following rules with regard to the Engineer Department are to be observed:-

The Engineer, besides the regular duties which appertain to his position, shall have the control and care of the jack-shaft and shall see that the bearings of the same are properly oiled

The Engineer on watch shall unship the clutches communicating the power with the jack-shaft when he shuts down for the day, and the Engineer on duty shall replace the same before starting the engines at the beginning of the days work, and shall ship and unship them at such

other times as occasion may require.

The Machinest shall be responsible for the shafting, pulleys, &c. beyond the jack-shaft and keep the same in running order

The Millwright and oilers shall be under the control of the Machinest. The Millwright shall see that the oiling, cleaning, and other necessary work to keep the lines of shafting in complete running order is properly done, and shall report to the Machinest any repairs which may be necessary to keep the same in good condition. He shall also see that all clutches are unshipped at the end of the days work, and shall ship the same before the Commencement of the

2

days work - this holding good to all clutches beyond the jack shaft.

By order of the Superintendent

Rec'd.

Nov. 26th 7

Sir,

Under the authority received from you dated 28th ult. I shall commence the Coinage of a limited amount of Half and Quarter Dollars, say $5000, in the course of a few days.

As the stock of Silver Bullion transferred from the N.Y. Assay Office is now reduced to about 2900 ounces, which will not be sufficient to meet the above Coinage, I will thank you to inform me whether I shall charge the above to the "Uncurrent Silver Coin for Recoinage Account" or to the "Trade Dollar Redemption Account"? or will you have my stock of Silver Bullion increased for that purpose, by a transfer of Bars from the New York Assay Office?. An early

reply will be appreciated.

Very Respectfully.

Novem. 28th 7

Sir.

In my Ordinary Expense Account for the month of October, you will find a bill of Dr. Thos. G. Morton, of this City, amounting to $15. for professional services rendered by that gentleman, to three of my Employees. I am informed by the Director of the Mint, under date of 21st inst. that you have decided that this expenditure cannot be allowed, notwithstanding the fact, that we have precedent for incurring such expense. I have no wish to trammel you in the discharge of your duty, as it concerns this matter, and will of course, refund the amount to the Accounts, upon notice from you of its disallowance. But I desire that you should have a full explanation of the facts,

2

in connection with the necessity of employing this physician, and also to inform you, that I have never before been officially advised of any liability in incurring an expense of this kind.

Two of these three persons mentioned, were suddenly stricken with alarming illness. Mrs. Hinchey, an Adjuster, was taken violently ill, and her life was despaired of. She remained at home for about two months; a part of the time, in a critical condition.

Jos. C. McElhone, fell insensible while standing at the Falls and as is always the case under such circumstances, those about him were greatly alarmed, and sent at once for the physician, who ordered him to be carefully watched for over an hour.

Sallie Clark, was seriously cut in the hand by the falling of a fire axe from its fastenings, and it was necessary to have the cut sewed up at once.

These emergencies occurring in the Mint at night, and after I had left the Institution, and no notice ever having been received from the Department, that such expenses were not within the intention of the Appropriation, my Special officer, Thos. J. Gibson, unhesitatingly summoned Dr. Morton, in these cases.

I submit these facts for your information that if there are any palliating features about them by which you could feel your way clear to allow the expenditures, you have an opportunity to do so.

I am very respectfully.

Sir,

Enclosed please find bill of the Street Sprinkling Co. of this City, for $40. for services rendered in Sprinkling Chestnut St. in front of the Mint from April 11th inclusive to June 30th 1887. which sum is payable from the Ordinary Appropriation of this Mint for the last Fiscal year. Will you be kind enough to forward to this Mint, a Draft for the amount; and I will see that it is handed over to the Companies agent here.

It is proper that I should explain, that the Company failed to present their bill, until a short time ago, when they did so, covering a period of 6 2/3 months, embracing the old

said appropriation. As I am not able to pay I am obliged to take this course to have the account settled.

Very Respectfully

Supt

Hon. James P. Kimball,
Director of the Mint.
Washington.
D.C.

Nov. 29th 7

Sir;

Referring to my explanatory letter of 28th inst. relative to the sixteen defective 5¢ nickel pieces, received by me, through you, from the First National Bank, at Houston, Texas, I desire to state, that I have reimbursed that Bank for the amount so sent, and enclose herewith a copy of a letter sent by me, to the Cashier, which I submit for your further information, and in accordance with my letter aforesaid.

Very Respectfully,

Supt.

Hon. James P. Kimball,
Director of the Mint
Washington:
D. C.

(Copy)

Nov. 26th 7

Sir,

Your letter of the 18th inst, to the Secretary of the Treasury, returning sixteen broken 5¢ Nickels selected out of a lot received from this Mint, has been referred to me, with the Coins, through the Mint Bureau, for answer.

In reply I have to state, that these fragments of Coins, never left the Mint in the condition, in which they are now returned to me.

The Coins before being bagged and shipped pass under the vigilant eyes of the Counter, when they are spread out, one deep, in the shallow grooves of the counting board, and whilst it is possible that superficial defects may sometimes escape detection, in the rush of business

under the heavy pressure upon the Mint, it is simply impossible for broken coins to escape observation, and find their way into the bags.

The pieces you return, indicate brittleness in the Metal, which in its normal condition is very hard and intractable, and it is probably owing to overheating of the Blanks in annealing before they were delivered to the Mint to be stamped, and the fault lies with the Contractor who furnishes them in lots of 50.000 lbs at a time.

To enable me to ascertain more definitely how the fact may be, will you kindly inform me, in what condition the coins were received at your Bank, and whether they were subjected to any, and what, treatment, experimental or otherwise, after you opened the bags.

[illegible] with send you by Registered Mail sixteen good 54 Nickels to replace the broken

ones returned by you. The delay of which you complain in filling your order for these coins, was owing to the enormous demand for Minor [illegible], from all parts of the United States, and which I have not yet been able to meet, although running a new and powerful Steam Plant (put in, in August last) from 7 A.M. to 11 P.M. This of course is only part of our work, as we have coined an enormous amount of [illegible]mes, and the law requires 2.000.000 Standard Silver Dollars, to be coined every month irrespective of other Coinage. If this extraordinary demand for small coins could have been provided for two years ago, we would not now be so far behind [illegible] orders.

[illegible] proper to add, that during the Fiscal [illegible] on the 30th of June last, this Mint [illegible] shipped 1¢ and 5¢ Coins to the amount of 61.000.000 pieces, besides immense quantities of

4

other Coins, and the demand is such, that we shall have to keep on at the same rate for a long time to come.

Very Respectfully.
D. M. Fox.
Superintendent.

A. P. Root Esq.
Cashier First National Bank,
Houston.
Texas.

Nov 29 7

Sir,

In my letter of the 10th of October last, I suggested that a small brick arched room, on the Western side of the basement of the Mint, and immediately under the Melter and Refiner's own vault on the first floor should be converted into a vault for storage of coin, by putting in a fire-proof door and lock to make it secure.

Since that time, upon reflection, I have concluded not to appropriate that room to new uses, but to let it remain as heretofore: and now recommend, in lieu thereof, that the entire space on both sides of the Southern corridor in the basement, East of the Melter & Refiners stairs, be rearranged, and devoted exclusively

to the storage of coin and bars.

The transmitted blue diagram of the ground plan of the basement, will show you at a glance how that space is occupied, and for what purposes it is used at present.

Availing myself of the large additional space gained in other parts of the basement, by the removal of the old Steam Plant. I am now fitting up, water, and clothes closets, in in the Eastern side of the basement for the accommodation of workmen, and Employees; and as soon as they are completed I shall entirely remove, and dispense with, those that now connect with the Southern corridor

I shall also take out the heaters, and introduce steam, to heat that part of the building. I am now fitting up a Store-room for general supplies, where the hydraulic [illegible] formerly located, and shall then

vacate the vault under the front portico now occupied as a store-room; this will give a large amount of unoccupied space admirably adapted, with some alterations, to the commodious safe keeping of coin and bars, for which as you are aware, we have such pressing need.

I herewith send by Express a drawing on oil paper, of the space referred to, as I propose to have it rearranged. Vaults A, E. G. and H. on that diagram are now in the custody of the Cashier and are packed full of coin.

B. C. D. F. I. J. and K. are the new vaults, which we would gain by the proposed change, and they would immensely relieve our overcrowded condition, and furnish accommodation for many years to come.

Aside from the storage of coin, it will enable me to give the Melter & Refiner a separate vault, for the safe keeping of Silver

bars that are now, from necessity, exposed in wire cages in the open area on the first floor.

To make these desired changes, would only require a comparatively inexpensive reconstruction of some of the walls, and the cutting of new door-ways into the corridor.

It will then require burglar-proof doors and locks at entrances 1. 2. 3. 4. 5. and 6. which I suppose would properly be furnished by the supervising Architect.

I then propose to put an iron door in the corridor at Z. to cut off these new vaults from the rest of the Mint, and keep the iron door at K the Northern terminus of the passage way by the Eastern stairs, securely locked; with peremptory instructions that no employees of the Mint shall have access to that part of the Southern corridor, except the Cashier

his assistants who will have them in charge, and the Melter & Refiners officers, who will have access to the vault containing his silver bars.

The use of these newly adapted vaults, and the stringent regulations under which their use will be governed, will not only afford more ample space, but give me a feeling of security, under my heavy responsibility, as custodian of enormous amounts of government treasure, that I have not hitherto enjoyed.

The advantages of the proposed rearrangement and increase of our vault room, are so self-evident to my own mind, and I think, will be, to yours also, that I forbear to enter into any extended discussion of the subject, but I am so deeply impressed with its timeliness and importance, that I most earnestly urge it upon your favorable consideration.

6

As soon as I can have your sanction and approval, I will set to work to have the alterations made with the least possible delay, and shall hope to have them completed by the time the burglar-proof doors and locks can be furnished

Very Respectfully
W. H. Fox
Superintendent

Hon J. P. Kimball
Director of the Mint

Sir;

Since writing you several days ago previous to my Communication of yesterday's date which I sent you alone with plans by Adams Express Company touching the subject of Converting certain vaults in the front part of the building into storage vaults, I had an interview with the Agent of Messrs Farrell & Co, and gave him an outline of what I designed bringing to your attention on that subject and asked him to take a glance at the entrances to the proposed vaults and also to look at two of the vaults with a view of suggesting that they should be

steel lined, and the cost of furnishing doors and steel linings referred to.

He has just sent me a communication which indicates about what the expenses would be, so far as regards the burglar proof work.

I enclose that communication. It is of this date and addressed to me by Farrell & Co. Please let it have your consideration also.

2 Decem. 7

Sir

In arranging to remove the basement water-closets from their present very undesirable locations where they have often been extremely offensive, I have come to the conclusion that the proper location for the new ones for the workmen and employees would be outside of the building in the North Eastern part of the side-yard on Juniper Street and adjoining the east end of the Northern portico of the Mint. Properly Constructed they would be easy of access and their removal to that point would ensure at all times purity and sweetness of atmosphere throughout the building. They should be so constructed as to correspond in style and symmetry with the Northern front

of the new boiler house at the West end of the portico. The cost of their erection would depend of course entirely upon the materials used in their Construction and their general style and finish.

Such an addition to the Mint building seems to require the sanction and approval of the Supervising Architect, and if the project meet your approval I would suggest that you confer with him and request him to have one of his assistants make an examination of the premises, determine the style of the architecture of the new extension and furnish estimates of its probable cost, together with drawings and specifications of the work to be done. I shall be glad to hear from you on this subject at your

early Convenience

Very respectfully

Sir,

Referring to my letter of 17th ulto, suggesting the propriety of accepting the offer of Joseph Wharton, to increase the deliveries of Bronze 1¢ blanks, to 300.000 lbs, I have to say, that having received no reply from you thereto, the contract being nearly filled, with a continuous demand for the Coin, I would be pleased to hear from you in regard to the matter, by return mail.

The Contractor called upon me today, and desires to be informed, as to what the decision is to be. I enclose herewith a copy of a letter, furnished me by Joseph Wharton, and beg your consideration of the same.

In connection with the subject, I might state, that the offer of the Contractor

to you, to furnish these blanks, milled and cleaned, at an advance of 3¢ per lb, does not appear to offer any advantage to the Mint in the output of the Coin.

Very Respectfully.

Hon. James P. Kimball,
Director of the Mint.
Washington.

Supt.

Copy

Philadelphia, Dec. 8th 1887.

Hon. D. M. Fox, Supt. U. S. Mint,

Dear Sir.

When bidding on Oct 20th to deliver bronze one cent coin blanks, I inserted a paragraph agreeing to deliver, in addition to 50.000 lbs. specifically named, further quantities within a year up to 250.000 lbs.

In response you ordered from me 50.000 lbs. of bronze blanks, but said nothing about any further quantity, and I understand that you had no instructions from the Director upon the subject of such further quantity; though in instructing you concerning my bid of Oct 20th to deliver Nickel-Copper blanks, he directed you to avail yourself of the option given to take from time to time if needed a similar 250.000 lbs. of supplementary Nickel copper blanks.

Copper has risen, since my bidding of Oct. 26th, about 5 cts. per lb, while, in the absence of any indication from you as to your pleasure concerning the additional 250.000 lbs. I have not felt authorized to purchase copper therefor.

You will perceive that your silence for more than six weeks brings me into a difficult position, and I now respectfully ask: First what in your judgement is my duty in regard to further deliveries, not yet ordered, on account of the option given Oct. 25th but not by you responded to or noticed in any communication to me, and Secondly what is your pleasure in the matter.

You will understand that I am not seeking to evade any just liability, but am desirous of knowing where I stand.

Phila. Dec. 3. 1887.

Yours truly

To. Hon. D. M. Fox. Supt U. S. Mint. Joseph Wharton.

7 December 7

Sir:

In obedience to the authority contained in your letter of the 5th instant, authorizing me to purchase additional from Lobdell & Wharton 75000 pounds of one cent blanks at 25.65 ¢ per pound, I issued an order to that gentleman under date of 6th inst.

This morning I am in receipt of a communication from him from which I quote as follows:-

"As to the bronze blanks I observe that
" you make no reply to my inquiry of 3rd
" inst. as to whether an option which I offered
" more than six weeks theretofore and which
" had not been in any [way] responded to,

"was to be considered as in force now that
" Copper has advanced from 10 cents to 16½
" cents per pound."

I respectfully ask again for your
views upon this point but meantime shall
lose no time in preparing to deliver the
"75000 pounds"

In my letter of the 3rd. inst. I enclosed a copy of a letter from Joseph Wharton of same date in which he states that copper had risen since his bid of October 25th 5¢ per pound & that my silence for more than six weeks brings him into a difficult position and he then asks the question "what is your [my] judgment
" is my [his] duty on account of the option
" given Oct. 25th but not responded to."

As I do not feel myself competent
to give an opinion to the contractor as re-

gards the paragraph first quoted, I respectfully submit the points in question to you for such detailed reply as your judgment would be best to make to Mr Wharton.

Hoping for an early reply

Very respectfully

[illegible]

Superintendent

Hon. James P. Kimball

Sir;

Your letter commending Miss Murden of Asbury Park to a position in the United States Mint, Philadelphia, under date of 3rd. inst addressed to Dr Kimball has been referred by that gentleman to me. There are no vacancies in the ladies department of this institution as none of the women are dismissed to make a place for another, and I can only depend upon voluntary resignations for vacancies. The only course the letter must take is that it will be filed for future consideration

Very Respectfully
David H Fox
Superintendent

Hon: W. L. Trenholm
Controller of the Currency
Washington D.C.

7: Dec:r 7

Sir

In reply to your letters of Nov. 11th and Dec: 6th I have to state that search has been made, without success, "for the medal circular of about the period 1873 or earlier"; and, no one now in the Mint has any knowledge of any sale to the public by the Mint by regular advertisement, of any experimental or pattern pieces.

If Mr. Newlin has any such knowledge he can doubtless find some way of verifying and vindicating his statement

Very respectfully
Dan McFox
Superintendent

Hon James P. Kimball
Director of the Mint
Washington D.C.

12 Decem: 7

Sir;

By your letter of 11th Nov you desired me to make a search for a medal circular of about the period of "1873 or earlier". On the 7th instant, I wrote you that search had been made without success for the circular in question, and also that no one in the Mint had any knowledge of the public sale by the Mint, by regular advertisement of any "experimental & pattern pieces"

I now wish to say that through the kindness of Mr. Lobo my Stenographer, who by some means outside of this institution obtained the information, I am in possession of a Manuscript Copy of a circular letter issued by Director Linderman

July 1. 1866 - a as much of it as refers to experimental and pattern pieces - which seems to furnish the very information desired by you.

I have been anxious to aid you in the matter and requested Mr Lobo to endeavor to obtain the desired information. On Saturday he reported that he succeeded, in so far as being simply allowed to borrow the Circular for copying.

Accompanying this is the Copy, which has been carefully compared with the "Circular". It gives me pleasure to forward it

Very respectfully

David McHose

Superintendent

Hon James T. Kimball
Director of the Mint
Washington
D.C

With Enclosure

Extract from "Circular letter in relation to American Medals and Cabinet Coins" issued by Director Linderman & dated July 1. 1866.

"

. . . . . .

The occasion calls for a revision of our operations in this line, and for some reduction of prices, . . . . . And as cognate branches, it is proposed to unite therewith, the annual issue of proof or master coins of the regular series, as heretofore; and the specimen or "pattern" coins which are not adopted, or do not become so, within the year of their date, (The term "pattern" is used here, out of deference to the technicalities of collectors, and not because of its peculiar fitness; for if the piece fails to be adopted, it is not properly a pattern. Expe-

rimental' is a better term.) These last have hitherto been given out, & withheld, by no rule whatever; although they have by degrees attained to a very considerable importance, on account of the eagerness of many collectors to obtain them. There is, indeed, a pretty strong reason, why these should be used only for their special purpose; namely, to aid the Treasury Department, or a Congressional Committee, in forming an idea of the size, appearance and practicability of any newly proposed coin, or of any change of devices in an old one. But it has been found impossible to put this rigid limit upon them. If we strike only a few, the ambitious collectors will have one at any price; and a competition is created, out of all proportions to the merits of the prize. It seems better, therefore, avoiding the error of making such pieces too plenty, to give some scope for the acquisition of them.

*Sic

The whole department will be under the su-

2

pervision of the Director of the Mint, and all inquiries and requests, with or without money, must be addressed to him. The medals and Coins will be in the responsible custody of one of his clerks, who will also attend to the orders, reply to letters, and keep the accounts. The making of dies and the striking of medals, proofs, and patterns, will be in the charge of the Engraver, and at his responsibility; other officers of the Mint rendering such aid of materials and machinery as may fall within their province. These arrangements, although internal, are here openly stated, with a view to assure the public that there is a system of suitable checks and guards, *against undue or secret issues.

* sic

. . . . . .

The ensuing rules are in plain terms, and hardly require a statement of reasons. It may be said, however, in regard to the Rule against striking a coin or pattern after its proper

date, that while it seemed desirable that some patterns of former years, which are very scarce or curious should be repeated, yet we could not issue them impartially, without giving out an indefinite number. And if some kinds are thus struck, there would be a call for other kinds; there would be no knowing where to begin or end.

Pieces struck out of date, bear a falsity on their face, and have not the interest or value of a synchronous issue. An uncertainty is also kept up, as to the extent of supply. And in the case of regular coinage, they so far falsify the Mint Records and Tables, as to the amount of Coinage and delivery, or as to the very fact of such and such pieces having been coined in any given year.

On the whole, therefore, it seemed a plain Course, to let the past go, and begin afresh. And it is a satisfaction to be able to assure all parties,

that there has been no resurgent striking in the present Directorship.

The striking of specimens in other than their proper metal, never much practiced, is to be discontinued. This irregularity has, of course, never been with unlawful intent, and never would have happened, but for the importunate desire to possess something odd, or to avoid the outlay of gold or silver. Such pieces have been struck, as patterns, from the dime of 1791 down to our day; but the united voice now is against using dies meant for gold or silver upon Copper or other base metal.

. . . . . "

"Rules

1.- No Coins, nor pattern pieces, shall be struck after the year of their date; and to ensure this, the dies shall be rendered unfit for that use

2. – No Coins, no patterns, are to be issued in any but their proper metal.

3. – Any experimental or pattern piece can be obtained at the Mint, within the year of its date, but not after. Standing orders for such pieces will be registered, and attended to. Any patterns that remain on hand, at the end of the year, must be defaced: it is not desirable to make them as common as the proofs of regular coinage. If any sets of regular proofs remain over, they may be sold the next year, but not later.

4. – The price of a pattern coin, in any but precious metal, will be three dollars in currency; if in gold or silver, the value of the metal is to be added. But when a pattern piece is adopted and used in the regular coinage, in the same year, it will then be issued as a proof, at a price near its current value; or

if it comes out early in the year, it will be placed in the regular proof set. The Director reserves the right to send a pattern piece, without charge, to any incorporated Numismatic Society in the United States. In such cases, if the pattern is in gold or silver, the value of the metal will be expected.

. . . . . .

6.- The profits of this whole department are reserved to the Medal Fund, which is a part of the public moneys; and are not to be a perquisite to any person holding a place in the Mint. All such persons are expected to refrain from dealings in this line, or affording aid to friends or dealers outside. If this expectation is counteracted, it will call for serious notice. The rule, however, does not apply to such Coins and medals as are not within the scope of this depart-

7

ment. And it is, of Course, intended that our Engravers shall be Compensated for their work on medals that are to be paid for

Henry R. Linderman
Director

(List of Medals appended.)"

(a) The "occasion" referred to was the "daily expectation of the receipt of a Hill's Engraving Machine, then recently contracted for and purchased under authority of Hon. Hugh McCulloch, Secretary of the Treasury, an English invention, for which it "was" claimed that "its superior powers, and singular ingenuity," would "supercede the other apparatus." The "other apparatus" was a french machine a Tour a Portrait of

Pantamine, which had been imported thirty years" for making dies from models and "to aid in the execution of medals and coin dies"

Another "circular letter" was issued 1 July 1867. It differs from that of 1866 in the correction of the errata in the latter, a few small verbal changes, and in additions to the lists of medals

13: Decem. 7

Sir:

As the item "special Assay coins sent Director" to which you refer in yours of yesterday belonged to the Cashiers Scope of duties I transmitted the letter to him for explanation.

In answer he says that it has never been the practice to forward special Assay Coins to the Director until on the last working day of each month, at which time, the entire reserves for special assay have been promptly forwarded and the entry made, on the daily statement of this office for that day: that upon examination of the Cashiers statements for years, it will be found that the "omission" referred to has been constant;

never before alluded to so far as he is advised, that "he is of opinion that Dr Lawver, the Director's Assayer, will recollect that the usual practice of forwarding special assays at the end of each month was deemed the best arrangement and it was understood that such forwarding should continue"

Of course if the word "promptly" in the section referred to, means, immediately on the receipt of the delivery from the Coiner to the Cashier; and that is your intention, - that plan will hereafter be adopted

Very respectfully

4

Dec^r 14^th 7.

Sir.

The letter of Dec. 9^th to the Treasurer U. S., from C. Rehm, Indianapolis, Ind. inquiring the value of a piece of which a rubbing was enclosed, and referred to me for answer, by your endorsement of the 12^th inst. is herewith returned, with the information, that the supposed coin is a Goloid Metric dollar, one of a set of experimental pieces struck by order of Director Linderman with the approval of the Secretary of the Treasury, in compliance with a request of the House Committee on Coinage. How many of these experimental pieces were struck and distributed I am not able to say, as no record appears to have been kept of them. The Goloid Metric dollar

is of no value as money, it not being a legalized coin. As a numismatic curiosity it would probably not bring more than One Dollar and a half, to two dollars in the market, at the present time.

Very respectfully,

Daniel M. Fox

Superintendent,

Hon Jas. P. Kimball
Director of the Mint,
Washington. D.C.

Dec. 14th 7

Dec. 14 /

Dear Sir;

In return for the Treasury draft of $100— enclosed in your letter of the 9th inst. I have to day sent you — by the Adams Express Co. as requested, One hundred gold dollars of 1887.

Yours truly

R. E. Preston Esq.
Director of Bureau,
Washington
D.C.

14: Decem. 7

Sir,

Enclosed you will find a blue print of the basement story of this building, with the rooms of the Southern part facing on the corridor running parrallel to Chestnut street to be adapted to the purposes of storage vaults, a memorandum note, carefully prepared which will I hope aid you in recalling to mind the disadvantages under which Stores for want of them, also with lithographic elevation of the whole building with proposed third story over the whole, and a tracing paper plan of the Southern part which will show you how I desire the storage vaults work to be done

I wish to say that I am impressed

with your criticisms of the lithographic plans as not being strictly in harmony with the style of architecture of the rest of the the building. I am not wedded by any means to the plan I send you. I am simply anxious to utilize the space above for the business of the institution as I cannot find room horizontally, the Government having declined to purchase further ground. But if a third story can be added to the building so as to afford me the additional cubic feet of space embraced, I care not how it may be designed; - I will be delighted and therefore I submit the whole matter to your superior experience and judgment, prefacing it by saying whatever recommendation you make as regards appearance and nature of plan I will readily accord

I

with.

You will permit me kindly to suggest that your own attention be directed be given to the construction of the marble wall on the eastern part of the premises facing the North front and arrangements for water-closets and urinals in the yard of the building communicating with the sewer on Juniper Street, so that I may have your judgment as to how I can make entrance under the portico without injury to the strength of that part of the building.

As the session is upon us now it will be a matter of great movement to have this matter of the 3rd story improvement so far as making out the plans and specifications speedily completed. I shall be very glad to hear from you as early as

conveniently can be

Very respectfully

Dan'l M. Fox

Superintendent

Hon: William A Brewer

Supervising Architect

Washington

D.C.

With enclosure

Memorandum

The proposed conversion of the greater part of the stone-wall Compartment bounding the line of the South Corridor in this institution, lies between two staircases on both sides. At present that one marked I has two water-closets in it; but no door opening into the Corridor; I is mainly occupied with apparatus to heat the rotunda; H is full of coal, having a window on the East side, facing the eastern grass plat

that window is seemingly secured by bars and shutters. The present superintendent has added a steel plate covering the whole of the space of the window making it as

building. With regard to this (C) it is proposed to wall up with heavy granite, the doorway on the rear or North end, make stone jambs on its front on the Corridor and a suitable door with Combination lock. This Compartment thus made, if lined, will be admirable for the storage of gold. B similarly secured, will make an excellent storage Vault of good capacity; A is already filled to repletion and sealed up though its door could with very little effort and sharp prying be opened.

At the east end of the Corridor is a window. The staircases at both ends of the Corridor are of stone very durable. Behind the staircase ~~to the eastward~~ are two privies, which with very little effort an entrance could be made made into E. I is this entrance from the Saloon of the

secure as he could by that means. The entrance is by an iron panel door of about 3/8 in. thickness with an old fashioned lock; E is the only vault in which bags of silver can now be put and this vault will probably be filled to its entire extent by March next; if it is our capacity for storing silver will be exhausted; E is protected by another smaller iron door of ancient pattern and lock of like character - either, or both these doors can be opened by prying; D is an apartment throughout used for clothes - closets for the men. If B and D this apartment is steel-lined and the door facing on the corridor of a secure character with lock attached they will be admirably suited for purposes of storage; C is an open space, at the rear or Northend of which is a wooden door which when opened communicates with the rest of the basement of the

3

basement leading into the Corridor, where it turns. The passage way from Juniper Street is directly alongside of I and easily Communicating with the whole basement outside of the building. Along the rear of the North tier of rooms thus made, a large amount of lumber and bricks are piled and the lower room of which contains a wooden apartment at present used for storing coal, but it would be a very easy and convenient place to make access into the vaults, to spoken of. They are all very insecure at present and the vaults now used for storage of Coin are in great hazard.

It is proposed to remove all the water-closets and clothes-closets now furnishing Convenience of that character, for at least 50 men, to the Northern part of the building and it is proposed to secure the Corridor aforesaid

by iron gates, both on the East and West. Thus she will have the advantage of exclusion of every-body from this part of the building except those who have business at the vaults.

Room has already been furnished for the clothes closets in the Northern part of the building, and it is proposed that the approval of the supervising architect to provide conveniences of that character East of the northern façade by furnishing an exterior appearance in marble similar to that which shows a part of the boiler house on the West front. This will not only make symmetry and complete the appearance of the North front of the Mint but will utilize a portion of the ground on the East side which at the present can be conveniently put to this purpose. Inside the marble wall in

such manner as may be approved by the Superintending architect, it is proposed to arrange all the Water closets for the workmen. The convenience of these will be that the odors, if there be any will be outside the building though care will be taken to keep that part of the premises clean and free from offense by detailing one a man every day to flush the seats and arrangements that may be placed there. All this is predicated, upon, first, an appropriation from the department, and, second, the judgment and approval of the Superintending architect, as to its not only adding to the appearance, but being in perfect harmony with the other part of the North front. In years past the basement has been one extended nuisance from the indescriminate mode of placing privies wherever there was a space in it whether there were conveniences for the removal of

fecal matter or not and it has become that it certainly must from long usage and carelessness be deleterious to the health of those concerned in the attic.

Sir;

Your inquiry as regards the pay by Quarter Master Ludington to Mr Eckfeldt the Assayer of this Mint of $12.00, the Assayer Certifying that he received $4.00, and whether the remainder $8.00 had been deposited in the Treasury, I referred to the Assayer for report.

Enclosed you will find a copy of his letter of current date making answer to the inquiry which I presume will satisfactorily explain the matter

Very respectfully
[illegible]

Superintendent

Hon James P. Kimball
Director of the Mint
Washington D.C.

Assay Department

December 15. 7

Sir;

In regard to the letter of the Director of the Mint of the 14th inst, making inquiry Concerning Charges in Assaying "gold Lace" - There is an error in supposing the $12.00 to be the Assay Charge - Twelve Dollars was the charge for the Assays; and by agreement with Col. M. L. Ludington, Quartermaster, I was to pay the expense of fraying the "Lace" and getting it into Condition for Assay, to be reimbursed by the Quarter Master's Department all in one voucher which the $12 Covers. The fraying of the Lace not being done at the Mint

Very respectfully

Jas. R. Eckfeldt

19: Decem: 7

Sir;

Farrell & C. through their Mr. Remington on the 17th, handed me duplicate copies of their proposal addressed to you in relation to vault linings and doors at this Mint for my inspection and consideration. I have read them and have the honor to return the proposal for lining vault marked B on ground plan of the Mint, and beg to say that as respects the price named I have no opinion to express not being conversant with the details of such work; and, also to say that a vault lined according to the specifications as therein contained, having burglar proof doors and locks, & I believe would be perfectly burglar proof to-

cated as the vault proposed to be hired is located.

I beg to say further that the necessity for the early completion of this vault is pressing as we have nearly reached the limit of our storage facilities.

Already we have difficulty in storing dimes and if a stock is to be accumulated we cannot store it in the absence of such accommodations as the vault proposed would furnish. I may say in addition that it is altogether desirable that parties known to you and identified with our City and interest should be employed to do the work - even the mechanics employed about the Mint in such a work should be well known to persons known to yourself, if not personally known to you, and for reasons which will be obvious enough to person har-

ing custody of the Treasury. For these reasons it is to be hoped that the approval of Farrell & Co, - if no other local artificers bid - will prove perfectly reasonable in price as I hope it will prove satisfactory in specification

Respectfully

Superintendent

Hon William A. Freret
Supervising Architect
Washington

Hon. Jas. P. Kimball.
Director of the Mint.
Washington D.C.

19. Decem: 7

Sir,

I desire authority of purchasing two chandeliers & gas fixture arrangements for the room appropriated to the exhibition of Coins and medals.

You will recollect that there is hardly sufficient light for inspecting with distinctness and care the large collection deposited there for the public view: also, that neither on the North or South sides are there any windows; the only windows are those on the West and East. In the dome overhead the light comes through colored glass panes — red and blue and dark variegated - which emit very little light. The cases - particularly those against the walls can scarcely be seen

1

except in shadow and especially so in cloudy days. As the collection is quite large the room ought to be sufficiently illuminated to exhibit both coins and medals to the best possible advantage. I am told that the Chandeliers can be had for somewhere about $35.—. Our own employees will do the gas fitting.

As we are approaching Christmas very rapidly, and crowds begin to gather in, which also interferes with the light of the room, it would subserve the public convenience to have the lights put in as speedily as possible.

Will you kindly therefore, as soon as can be, advise

Yours respectfully

Dan'l M'Fox

Superintendent

Hon: James P. Kimball

Mint of the United States at Philadelphia, Pa.
SUPERINTENDENT'S OFFICE

19 December 1857

Sir;

The Hon. James C. Dunlap, Director of the Mint has transmitted to me a copy of your letter to him under date of Decem. 5th with some fragments of nickel accompanying the same, found upon opening a few of the sacks received on the last transfer order from this Mint.

The subject is now undergoing investigation to ascertain where the fault lies, and the indications are that they arise with the Contractor for supplying nickel planchets for coinage in the annealing of the fillets.

We have taken two samples of broken pieces that you furnished and had them analyzed and although not fully up to the

standard of proportions of nickel and Copper they are within the limits allowed by law. The Assayer has charge of the investigation which is now proceeding.

Will you be good enough to inform me if there are other and how many pieces have been rejected with a view to their return to this Mint possibly by Registered mail which would be preferred if the number is not excessive. We will supply their place with good Coin

Very respectfully

19: Decem: 7

Sir;

Inclosed you will find copy of a letter of this date addressed to the Assistant Treasurer at San Francisco, referring to the fragments of Nickel which accompanied his letter to you of 5th inst. You will observe that I am having a portion of the material assayed at present, and some progress has been made in this. While the Assayer reports that the proportions of nickel are within the tolerance of the law, he is of the opinion that the fault lies in the annealing by the Contractor who furnished it to us apparently in condition for coinage. The rerolling, I enclose herewith of two samples which

after assaying was carefully annealed, and the result was that the proper ductility & toughness was almost restored as you may see by the enclosed samples.

The Assayer says it is our practice to assay samples from every lot of blankets soon as received. We have never found any outside of the limits of fineness allowed by law and in regard to the ductility of the pieces they were without any exception perfectly ductile.

In short it would seem that there was some fault in the annealing process by the Contractor which it would be very hard for us to detect in receiving the blankets and merely stamping them, unless there would be some crumbling propensity in this portion.

I enclose a copy of the letter of Mr.

2

Eckfeldt the Assayer addressed me, of current date touching this subject

Very respectfully

Superintendent

Copy

Assay Department. Dec 19 7

Sir,

I have assayed the fragments of brittle 5 ¢. Nickels from the Assistant Treasurer at Sanfrancisco, received through the Office of the Director of the Mint.

The assays are as follows, —— ——
(No 1) 23.7 per cent Nickel (No 2) 23.9 per cent Nickel. Though not fully up to Standard, they are within the limits allowed by law.

I am pretty well satisfied that the trouble arises from the metal not being properly annealed.

By way of experiment, I took a piece of the brittle nickel, and carefully annealed it. The result was that the proper ductility or toughness was almost restored, as you may see

by the enclosed sample.

It is our practice to assay samples from every lot of blanks, as soon as they are received, we have never found any outside of the limits of fineness allowed by law; and in regard to the ductility of the pieces, they were without any exception perfectly ductile.

Very respectfully
Jacob B. Eckfeldt

Hon. Daniel M. Fox, Supt U. S. Mint.

Dear Sir,

Answering your advertisement, a copy of which is enclosed herewith. I hereby offer to supply the Mint with fifty thousand pounds of cleaned and milled Five cent copper Nickel blanks at the price of forty two and one tenth cents per pound.

And since your advertisement calls for bids to supply "50.000 lbs. more or less," I further offer to accept and fill from time to time, within twelve months from this date your supplementary orders for two hundred & fifty thousand pounds additional of the said blanks at the above named price of 42 1/10 cts per lb. making a total offering of three hundred thousand pounds.

Yours truly
Joseph Wharton.

(Order)

31 Oct. 7

Sir;

Under date of 29th inst. the Director of the Mint has signified his approval of my award to you of the Contract to furnish fifty thousand (50.000) lbs, more or less of milled and cleaned 5 cent nickel blanks at 42 to cents per lb, net; and he further authorizes me to accept your offer to fill from time to time, within 12 months from the date of Oct. 20th, any supplementary orders for said blanks within the limit of Two hundred and fifty thousand (250.000) lbs, additional at same price.

Very respectfully.

Dan'l Fr. Foy.

Supt.

Joseph Wharton,

Sir:

Referring to your Transfer Letters dated the 28th inst. covering the Shipment of 13.000.- Standard Silver Dollars to Pittsburgh and New Castle Pa, and Wilmington, Del. I desire to call your attention to the fact that the printed heading directs that "the expense of transportation is to be paid by this Department". Will you have the kindness to inform me by return mail, whether the above instruction is known, and if so, what disposition shall I make of the bills for such transportation, both for this and any future similar orders.

Very respectfully

Supt.

Hon James H. Hyatt.
Treasurer U. S.
Washington. D.C.

Assayer

31: Decem: 7

Sir

In reply to your letter of the 25th inst. to the Director of the Mint at Washington, and referred to me for answer, I have the honor to state for the information of your Correspondent in Mexico, that we have in use in this Mint several automatic weighing and sorting machines that weigh planchets or blanks for silver dollars, half dollars, and quarter dollars & that separate the blanks into 4 classes; - those that are light, or heavy, but within the limit of the legal tolerance in weight; also those that are lighter or heavier than the legal tolerance. The blanks that are too heavy are afterwards filed and adjusted to the

proper weight by hand. These machines work all day long with sensitive accuracy with only one attendant to fill the blanks into the tubes of each machine.

Our gold coins are all adjusted by hand, being too heavy for these machines, except the Half-Eagle which can be weighed on them if necessary. With this exception all our gold coins are adjusted by hand.

These sorting machines were purchased from the Manufacturers Seyes & Co. Alzeredorf Bei Wien, Austria. The price, I believe, was 11.000 francs a piece.

Very respectfully

Superintendent

Jan. 4th 8

Sir;

I return herewith Transcript no. 675 closing Recoinage and Bullion Fund Accounts for the calendar year ended Dec. 31st 1887, with the amount of C/D. no. 21445 for $3,708.29 debited therein as a settlement in full for the Loss by recoinage of Silver Coins.

Will you allow me to suggest the propriety of addressing a letter when you forward recoinage certificates? as, by such a method, the probabilities are greatly lessened of omitting to debit your account with the same.

The above certificate was duly received, endorsed and filed away, under the supposition that it referred to Shipments of Coins.

Very Respectfully
D. M. R.
Supt.

Hon. James W. Hyatt.

4 January 8

Sir;

I have the honor to transmit herewith the following statements for the Calendar year 1887: viz:-

1 The number of dies furnished to the Coiner of the Mint by the Engraver;

2 The number of dies used by the Coiner, with a certificate of their destruction at the close of the year under section 3550 of the Revised Statutes.

3 The number and denomination of pieces Coined, with the number of dies used in the Coinage, and the average production to the pair of dies;

Very respectfully

Hon: James Pollock
Director of the Mint
Washington
D.C.

Superintendent

January 4 8

Statement of the number and description of Dies, used at this Mint during the Calendar year 1887 - including dies for proof Coins - and which we certify were defaced and destroyed by the Coiner, in the presence of the Superintendent and the Assayer under section 3550 Revised Statutes:-

| | Gold | | | | | | | Silver | | | | | Minor | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| Dies | Dble Eagle | Eagle | Half Eagle | Three Dollar | Quarter Eagle | Dollar | Total | Sd Dollar | Half Dollar | Quarter Eagle | Dime | Total | Five Cent | Three Cent | One Cent | Total | Grand Total |
| Obverse | 1 | 3 | 1 | 2 | 2 | 3 | 12 | 55 | 4 | 2 | 45 | 106 | 143 | 3 | 154 | 300 | 418 |

Dan'l M. Fox Superintendent
W. J. Steel Coiner
Jacob B. Eckfeldt Assayer

Coiners Department
January 3rd 8

Hon. D. M. Fox
Superintendent
Sir;

I have the honor to report that the following dies were used in the coinage of 1887: to wit:

| Dies | Gold | | | | | | | Silver | | | | | Minor | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Double Eagles | Eagles | Half Eagles | Three Dollars | Quarter Eagles | Dollars | Total | Standard Dollars | Half Dollars | Quarter Dollars | Dimes | Total | Five Cent | Three Cent | Cents | Total | Total Pieces |
| Obverse | 1 | 3 | 1 | 2 | 2 | 3 | 12 | 55 | 4 | 2 | 45 | 106 | 143 | 8 | 154 | 300 | 418 |
| Reverse | 1 | 3 | 1 | 2 | 2 | 4 | 13 | 54 | 3 | 2 | 45 | 104 | 138 | 8 | 161 | 302 | 419 |
| Total | 2 | 6 | 2 | 4 | 4 | 7 | 25 | 109 | 7 | 4 | 90 | 210 | 281 | 6 | 315 | 602 | 837 |

These numbers agree with the numbers reported by the Engraver as delivered to the Coiner during

the year 1887, and include the dies used for striking proof coins.

All of these dies were destroyed this day by the use of the forge and sledge, in accordance with the provisions of Section No 3500 Revised Statutes.

The following statement exhibits the number of pieces struck per pair of dies used during the year 1887, and includes the dies employed to strike proof coins, as the proof pieces appear in the aggregate of pieces struck.

Statement of the number and denominations of pieces coined with the number of dies used in their production, and average production to the pair of dies during the year 1887

| Denomination | Number of pieces Coined | | | No of dies used Obverse | Reverse | Total | Number of pieces struck per pair of dies used | |

5: Jan'y 8

Sir;

For a number of days last - almost continuously - Mr Steel the Coiner, has reported to me, and shown me, samples of a quantity, not large, of nickel 5 cent pieces, coined from the blanks, furnished by Mr Wharton under contract, which break and crumble upon the slightest pressure being made upon them. I have spoken to Mr Wharton, and he has answered me by saying that it is too bad, and he will endeavor to have it corrected.

The repetition of this obliges me to report the fact to you. There seems to be an inability upon his part to succeed

in the correction. My officers say it arises from being burnt in annealing. I am at a loss to know what to do, and ask that you advise me. It may bring us into disrepute if this goes much further, and these pieces get into the hands of those who discover the brittleness of the Coins and make the subject public. I do not mean to say this covers them all. it occasionally shows itself, before delivery here in the same manner spoken of.

Very respectfully

Superintendent

Hon: James P. Kimball
Director of the Mint
Washington
D.C.

5. January 8

Sir

In response to your letter (10. L.) of the 4th inst., with reference to Coin deliveries in December last, I herewith forward to day by Registered mail for Special Assay one three-dollar gold piece, from deliveries in that month, and one silver half-dollar, and one quarter-dollar, in answer to your complaint of omission to supply Coins for assay from deliveries of proof gold and silver coins technically delivered to the Superintendent. The Cashier explains that in fact he never touches proof coins at all, but accepts the statement of the Coiner that he has delivered such Coin to the medal-clerk which

officer delivers an equivalent in gold or silver for the proofs sold by him.

After the deliveries of small gold, five dollars in dollars, and five dollars in quarter eagles, were sent to your office Dec: 31st. ulto. As the small silver delivered was from the melts from which the dimes had already been taken and sent: and, as the small gold ($3) was from the same melt as the quarter eagles and one dollar pieces, the Cashier did not suppose it would be necessary to forward them

Very Respectfully

[signature]

Superintendent

Hon James P. Kimball
Director of the Mint
Washington
D.C.

[illegible]

6: January 8

Sir:

I have the honor to receive from you by this days mail 2 Copies, being proposals of Farrel & Co. addressed to the Hon: William A. Faeret, Supervising Architect of the United States Treasury Department, both of date of Dec: 17th one of these for vault linings describing specifically the character of the material and the work to be done in that particular, and further saying - (without any previous mention of doors) as follows - "the doors to be "the same as specified in our proposal "of Nov. 30th 1887, without a time lock". The other of the two proposals has allusion exclusively to doors to the storage vault

in the Sub-treasury at Philadelphia, and I have no other proposal & specification touching the strengthening of the doors in this Mint building, as suggested by the writer. I am accordingly led to believe that the copy of the proposal referring to vault doors in the Sub-Treasury building, has, by an inadvertent mistake, been sent to me (and which I here enclose) instead of one from the same parties giving detailed specifications for the strengthening of the doors of the other vaults in this Mint building.

Will you have the goodness to have inquiry made whether there is a proposal specifying the latter character of work — it would seem to be of date of November 30. 1887 — and on receipt of the

papers desired, I will at once follow the instructions given me in your letters

Very respectfully

A. M. Fox

Boise City, Idaho.

January 7th 8.

Sir.

You will see by the enclosed copy of a communication received this morning from Geo. B. Newton & Co. that the question of Coal supplies for our Melting furnaces, has become quite a serious one. In October last when Wm. Bryant, the lowest annual bidder informed me he could not furnish the Melting Coal at all, for he could not get it, I accepted the proposal of the next lowest bidder, Newton & Co. but they informedme in reply that they could not make a contract for the year, but would supply the Mint as long as their Stock then on hand, held out. That supply is now exhausted, and I see no

alternative, but to take such coal as they can get at $6.50 per ton. and with your approval I propose to accept their offer to that effect. They are an enterprising firm, who have served the Mint well for several years past, and will undoubtedly do the very best they can for us now. I shall be glad to hear from you by return mail.

Very respectfully,

Superintendent.

Hon Jas P. Kimball,
Director of the Mint,
Washington, D. C.

(Copy)

Geo. B. Newton & Co.
Anthracite and Bituminous Coal and Coke.
Office 308 Walnut St.
Philadelphia Jan. 6th 1888.

Dictated by W. H.

Hon. D. M. Fox.
Supt Mint of the United States,
Philadelphia, Penna.

Dear Sir.

Referring to our letter of October 19th, we would advise you that the strike in the Lehigh region still continues, and no Highland coal has been mined since the 10th of last September. The stock of this coal which we had on hand, and which we promised in our letter to deliver to you as it should last, has been exhausted. We can furnish you with the best Broken coal that can be obtained, but with this con-

tinued strike and the consequent scarcity of coal, prices have very much advanced, and $6.50, per ton is the best we can do, commencing on the 9th instant.

Please advise us if you desire us to continue deliveries.

Yours truly,
Geo. B. Newton & Co.

Sir:

I am in receipt of a letter from George B. Munson, Assayer in Charge of Denver Mint, which letter accompanies a Shipment of Gold Bullion (no. 21) for coinage on Government account, and for transfer to Bullion Fund.

The Assayer of the Denver Mint requests that "no charges or deductions be made" on a portion of this Bullion comprised in "Sweeps and Change and Charges bars." I am in doubt as to whether it would be proper for me, to comply with his request, unless authorized by you, and respectfully submit the question for your decision.

Will you kindly make reply by return

Jan. 12th 8

Sir;

Referring to my letters of the 6th and 13th ults, and your replies thereto of the 12th and 14th ults, relative to checking the bills of the Adams Express Co, for transportation of Silver Coin, it now becomes my duty to inform you of my embarrassment in attempting to verify said bills, notwithstanding the fact, that I have access to the table of distances of the "Quartermaster General's Department" and the "Traveller's Official Guide".

The difficulty is, that the method of arriving at the distances, is such, that the Express Co. arbitrarily enters upon its bills, such distances, as in its judgement would be proper, the rates varying in cases where the Coin passes over two or more Railroad lines.

A Mint clerk, unacquainted with Express business, is obliged to accept the figures, in many instances, of the Express Co. he having no knowledge of the length of divergent lines etc,

Under the circumstances should I not be supplied with a Table agreed upon by the Express Co, and the Department jointly, and approved by the latter, as was the case heretofore, and this to prevent the liability to suspensions and re-payments.

There are two bills awaiting my approval, and it seems necessary that something more definite should be furnished for my guidance.

Abiding the receipt of your reply

I am,

Very Respectfully,

Supt.

Hon, James P. Kimball,
Director of the Mint.
Washington. D.C.

12: January 8

Sir.

I have to day forwarded by mail to the Chief of the Division of Stationery and Printing 2 gross of black lead pencils that are not what my requisition called for and are too hard for any use we can put them to.

I also have returned - in the same package - 5 press-copying books. My requisition called for special sizes, of white paper. The five sent we have no use for.

My requisition also called for 200 bundles of toilet paper, which was not filled. We had hitherto purchased it here, but the Supervising Architect has directed

that only a special quality be used;
hence it appearance on our requisition

Very respectfully

Superintendent

Hon: James P. Kimball
Director of the Mint
Washington
D.C.

12: January 8

Sir,

In reply to your inquiries of the 11th inst., with regard to certain items in our Ordinary and Refinery Accounts for the month of Decem. 1887, I have to state for your information that the "double-refined nitrate of potash" which was purchased from John Wyeth and Brother at 16½ per hundred pounds, proved upon trial to be unsuited to our purposes, and what we gained in price we lost in quality; and, therefore, we were obliged to procure further supplies from the Frankford Chemical Works who had furnished the article in former times. The price was higher but not so high for the quality of the article

and the use to which we put it.

Second the acid &c covered by voucher No. 508 was used to clean cents and therefore properly charged to the mint coinage account, and not to the account for parting and refining bullion

Very respectfully

Superintendent

Hon James P Kimball
Director of the Mint
Washington
D.C.

12: Jany 8

Sir,

The assorted coins specified in your letter of the 10th inst, and which you have transferred from the Mint Bureau to the Cabinet of this Mint by Express, have been duly received and placed in charge of the Curator of the Cabinet.

There were 105 pieces in all: there being two pieces of the Japanese gold yen, instead of one as mentioned in your list.

There are no very rare pieces among them and we are already in possession of specimens of most of them.

Very respectfully
Daniel M. Fox
Superintendent

Hon James P. Kimball
Director of the Mint
Washington D.C.

12: January 8

Sir;

In compliance with your request of the 11th inst, I herewith return the bond of Farrell & Co. in $3000 00, for their accepted proposal for lining vaults in this Mint.

Your instructions with regard to the new accepted proposal of Farrell & Co. for that purpose, will be Complied with, and the penalty check forwarded as soon as received to the Treasurer of the United States as directed.

When the work is completed, vouchers in duplicate will be forwarded for payment

Very respectfully
A. M. Fox

13: January 8

Sir,

I have received your Communication of the 10th inst., in reference to wages rolls and output of this Mint for the current fiscal year, and have noted its contents. When I suggested the propriety of a double shift in my letter of Sept. 2. 1886, I did it with a view of doing away with all overtime, having before me then the fact that with a coinage of about 25.000.000 pieces per year, there would be both economy and improvement as a result.

Since that time the Coinage has increased to about 31.000.000 pieces per fiscal year, and so anxious was I to fulfil the requirements of the Department

that I had no hesitation in running the force to its utmost capacity to thus produce this enormous output for such time as might be necessary.

My wish is and always has been to comply strictly with your views in the matter, and I now will undertake to stop all overtime, and shall strain my force of double shifts to 8 hours work each, throwing all my efforts, first upon the standard dollar quota and then as I can work it in, the minor coinage shall be kept up. The Dime and Gold Coinage shall be held as a reserve to be taken hold of as I see opportunity

Respectfully
Wm. E. Fox

Your letter of the 5th inst. notified me that you had forwarded a box, containing Annual Assay Coins for the last quarter of 1887. We last evening received three boxes from San Francisco by Express, but of the two additional boxes, I have no advices whatever. They are apparently from your Mint, and our conjecture is that they probably contain the Dies, you used during the last year. The law does not authorise me to open the Assay coins, and until further advice I do not know in which box they are contained. Can you throw any light on the subject that will

enable me to determine the contents of the boxes without opening them, that I may know what disposition to make of them. I will thank you for a reply by return mail.

Respectfully Yours,

Jan. 17th 8.

Sir,

I have received from the Mint of the U. S. at New Orleans, the Coinage Dies used at that Mint during the year 1887. The Obverse dies were defaced and destroyed, before being forwarded to me, but the Reverse dies, were not so treated, and the question now comes up, what shall I do with them. The regulations of 1874 page 19, were very clear on that point, but the present regulations page 22. leave it an open question. The reverse dies received from the New Orleans Mint, are some of them broken, and all of them so much worn as no longer to be fit for service.

It was my intention to have them defaced and destroyed as in the case of the Obv. dies, but I have thought it prudent to report the situation to you and await your instructions in regard to them.

Very respectfully
[illegible]
Superintendent

Hon Jas P Kimball
Director of the Mint,

" " " " "

Jan 20th 8

Sir,

The contract of Joseph Wharton for 50.000 lbs, one cent blanks, which was increased by your instructions to 125.000 lbs, under date of Dec. 5. 1887, at 25 65/100 ¢ per lb, will be filled probably today. The bids were opened Oct. 25th 1887.

Although the demand for Bronze 1¢ Coins has somewhat slackened since the holidays, in my judgement, it would be prudent to issue another order to this contractor, for say, 50.000 lbs, additional, based upon the provision of his bid, to increase, * maximum of 300.000 lbs, within twelvemonths from the date of his bid. I have no doubt, but what the relapsed demand for 1¢ Coins is temporary, and with the opening of the Spring trade, I

Suppose to be * to increase the delivery to a

shall be called upon for an increased coinage of Bronze pieces.

I would therefore respectfully request authority from you to issue an order for 50.000 lbs, at 25 65/100 ¢ per lb. as above stated.

I might add that the Contractor called upon me, and desired to know what the prospect was for future requirements for Bronze blanks, in order that he might prepare himself to meet the demand, and thus prevent any delay.

Very Respectfully.

Supt.

Hon. James P. Kimball,
Director of the Mint

30. January 8

Sir

In view of your verbal inquiry in regard to the consideration of striking $3 gold pieces, made to me in your recent interview - I have consulted with the Cashier of this Mint, whose judgment, made up of his long experience and observation as to the propriety of so doing and concurring with him in opinion, I have the honor to enclose to you a copy of a letter addressed to me by him touching the subject matter of inquiry which will give you the views of myself and him so intelligently that I refer you to it for the judgment we have in regard to the matter in question

Very Respectfully

Superintendent

Hon James P. Kimball

Copy

Jan: 20. 8

Hon: Chas M. Fox

Superintendent

Sir. In Compliance with your request for a statement of the stock of Three Dollar Gold Coins held in stock in your vaults, I have the honor to submit the facts as follows.

I think about one hundred and forty thousand (140.000) Dollars value of such Coin was struck in 1877-78, and a smaller number of pieces have been struck each year since, and there being no trade, or effectual demand, for the same the stock now reaches One hundred and fifty thousand Dollars. The Coin is wholly unnecessary for purposes of exchange though it is always kept in the Coining trays. Being a thin Coin it springs in striking and hence does not fill evenly and flatly and being an odd number it is not readily counted in settlements

Banks never want it, and depositors nearly always ask to be paid odd change in other Coins than be trunked with the $3.00 piece.

The bags in which the Mint stock of $3.00 pieces are stored are nearly worn out with the usual handling for the settlement. The Coin must also deteriorate from abrasion. I think it might properly be transferred to the Treasury unless the piece be abolished and the stock on hand consigned to the melting-pot

Very respectfully
M. N. Cobb Cash

It may be further said that the only demand for the Coin is for jewelry purposes and for jewelry

30. Jany 8

Sir

Miss M. J. Peckman, an Adjuster in this Mint having tendered her resignation to take effect Jany 31st. her name will be dropped from the rolls after that day

28: Janry 8

Sir;

Endeavoring to ascertain how there came to be a shortage of one dollar in our last shipment to your office, I discover that some of the thousand dollar bags after being filled were put inside of other bags, thus being doubly protected. Will you kindly inform me - if you know - whether the shortage occurred in one of the double bags or in one of the single bags, and if possible, which one

Very respectfully

A. M. Fox

Superintendent

Hon: James W. Hyatt
Treasurer of the United States
Washington D. C.

30. January 8

Sir,

In reply to your inquiry of the 25th ult., in reference to the Chicago and Aurora bars, I have to state for your information that whilst the Companies seem to be indicated, the bars appear to be from the original refineries.

About July, the invoices came here marked "Chicago & Aurora" and the bars were marked "Chicago & Aurora S. & R. Co"; and in that way they were entered in our books. Lately, in the Centre of the stamp of one kind of bar, have been the words "Chicago Works"; on the other kind, "Aurora Works". The bars are very different in appearance and size, and formerly were so in quality. The

Chicago", were often not receivable and whole invoices of them have had to be returned, while the "Aurora", have always been about the best bars received here.

To distinguished them, as they are from different refineries, they have been lately entered on our books, in the name of the refineries, or works.

If this method is unsatisfactory please let me know

Very respectfully

D. M. Fox

2: February 8

Sir,

It is rumored in the Mint that Dr. Booths resignation as Melter & Refiner was accepted by the President, somewhere in the month of January last past. If this be correct and has good foundation it is essential that I should know it, as it involves very serious consequences, such as payments of salary up to the time of such acceptance, and the settlements of his his accounts and possibly a suspension of the work in the Melting and Refining Department pending such settlements and steps ought to be taken in the Meantime as regards the responsibility incurred by reason of that Department being unlegalized head. As I understand

it his successors appointment is still lying in abeyance in the Senate unconfirmed. Of course this becomes a matter of much concern to me as regards my duties in the premises and I therefor ask that you will kindly apprise me by telegram if the rumor has correct foundation and also by letter give me instructions as to what steps I should take in the premises

The affairs and property of the Melters and Refiners Department is at the present and has been through Dr Booth's illness under the care and attention of N. B. Boyd Esq. Asst Melter & Refiner.

On second thoughts it may be that the President accepted the resignation - the acceptance to take effect upon qualification and Commission of his success.

Course I would be glad to be informed. I may say that Mr Booth is at present lying quite ill at his residence and was unable to receive the Salary credited to him for the month of January.

Another question is here involved. What shall I do about his salary and up to what time shall it be allowed?

Very respectfully
Your Obt Svt
Superintendent
